

Education Platform UI/UX Design

Introduction

The **EduLearn Mobile Application** is a modern educational platform designed to provide students with easy access to online learning resources. The application offers a simple, clean, and user-friendly interface that allows users to browse courses, view course details, and learn through high-quality educational content. The main objective of this project is to create an engaging learning environment while ensuring a smooth and intuitive user experience.

The prototype was designed in **Figma** by following basic UI/UX principles such as consistency, simplicity, readability, and easy navigation. A minimal color palette, attractive typography, and well-organized layouts were used to improve usability and provide a professional appearance.

Design Objectives

The primary goal of this project is to design a mobile application that enables users to explore educational courses quickly and efficiently. The interface focuses on minimizing user effort while maximizing accessibility and visual appeal.

The main objectives include:

- Designing a clean and modern user interface.
 - Creating an intuitive navigation flow.
 - Providing quick access to educational courses.
 - Improving the overall learning experience.
 - Ensuring consistency across all application screens.
-

Screen Descriptions

1. Splash Screen

The Splash Screen is the first screen displayed when the application starts. It introduces the application's branding through the EduLearn logo and tagline, "**Learn Anytime, Anywhere.**" The design is simple, helping users immediately recognize the application's purpose before entering the main interface.

Features

- EduLearn logo

- Application name
 - Educational tagline
 - Clean and minimal layout
-

2. Login Screen

The Login Screen allows existing users to access their accounts securely. Users enter their email address and password to sign in. A "**Continue with Google**" option is also provided for faster authentication. Navigation links for creating a new account and password recovery improve accessibility and convenience.

Features

- Email input field
 - Password field
 - Login button
 - Google Sign-In
 - Sign Up option
-

3. Sign Up Screen

The Sign Up Screen enables new users to create an account by entering their personal information, including full name, email address, and password. Password confirmation helps reduce registration errors and improve account security.

Features

- Full Name
 - Email Address
 - Password
 - Confirm Password
 - Sign Up button
 - Login redirect option
-

4. Home Screen

The Home Screen serves as the application's dashboard. It welcomes users and provides quick access to learning resources. A search bar allows users to search for courses, while featured and popular courses are displayed in attractive cards with images, ratings, and pricing.

The layout is organized to make course discovery simple and visually appealing.

Features

- Welcome message
 - Search bar
 - Featured Courses
 - Popular Instructors
 - Course cards
 - Ratings and prices
-

5. Course Details Screen

The Course Details Screen provides complete information about a selected course. Users can view the course thumbnail, instructor information, duration, description, ratings, and enrollment option. This screen helps students make informed decisions before joining a course.

Features

- Course image
 - Course title
 - Instructor information
 - Course duration
 - Description
 - Ratings
 - Enroll Now button
-

6. About Screen

The About Screen provides general information about the EduLearn application. It explains the purpose of the platform and includes contact details for support. The application version is also displayed to inform users about the current release.

Features

- Application description
 - Mission statement
 - Contact information
 - Version details
-

UI/UX Design Principles Used

Several UI/UX principles were applied throughout the design to improve usability and user satisfaction.

Simplicity

The interface avoids unnecessary elements and presents only the information users need.

Consistency

Buttons, typography, colors, and spacing remain consistent across all screens, creating a familiar experience.

Visual Hierarchy

Important elements such as headings, buttons, and featured courses are highlighted using size, spacing, and color to attract user attention.

Accessibility

Readable fonts, appropriate spacing, and clear icons improve usability for a wide range of users.

User-Centered Design

The navigation flow is simple and intuitive, allowing users to move between screens without confusion.

Color Scheme

The application uses a combination of **white**, **black**, and **purple** colors to create a modern and professional appearance.

- **White:** Clean background that improves readability.
- **Purple:** Primary action buttons and highlights.
- **Black:** Headings and important text.

This color combination creates a balanced, attractive, and easy-to-use interface.

Conclusion

The **EduLearn Mobile Application UI/UX prototype** successfully demonstrates a modern educational platform with an intuitive and visually appealing design. Each screen is designed to support users throughout their learning journey, from account creation and course discovery to enrollment and accessing platform information.

The design follows essential UI/UX principles, including consistency, simplicity, accessibility, and user-centered navigation, resulting in a seamless user experience. This prototype provides a strong foundation for future development into a fully functional educational mobile application.
